EDUCATION

New York Institute of Technology Manhattan, NY
Bachelor of Arts in Computer Science, Minor Artificial Intelligence | GPA: 3.55 Sep. 2024 – May 2028

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, TypeScript, MATLAB, HTML/CSS
Frameworks & Libraries: React, Next.js, FastAPI, Flask, TailwindCSS, Node.js, Pydantic, LangChain, Pandas, NumPy, Matplotlib
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, PyCharm, Figma
Databases & Cloud: PostgreSQL, MongoDB, AWS

EXPERIENCE

Software Engineering Intern June 2026 – Present
Liberty Mutual Portsmouth, NH

- Developing full-stack features for a competitive filings platform analyzing insurance products across 100+ industry competitors using Python, FastAPI, React 19, TypeScript, PostgreSQL, and AWS.
- Improved internal search workflows reducing analyst lookup time by 30%, collaborating with engineers in Agile sprints.
- Supporting scalable enterprise tooling for competitor analysis and internal analytics serving 50+ stakeholders.

Frontend Developer Jan. 2026 – May 2026
NYC Civic Engagement New York, NY

- Developed frontend features for a civic engagement dashboard serving thousands of NYC residents across all five boroughs using TypeScript and React.
- Built and optimized 10+ responsive UI components, improving accessibility scores by 25% for public-facing civic data.
- Delivered platform enhancements increasing transparency into local voting and civic engagement processes.

Quantum Computing Intern Jun. 2025 – Aug. 2025
The Coding School Remote

- Researched quantum approaches for protein-folding simulations using Qiskit, achieving 25% error mitigation improvement over classical methods.
- Implemented Grover's search algorithm delivering 2x faster performance vs. traditional computational approaches.

Python Instructor Apr. 2025 – May 2025
Stanford Code in Place Remote

- Mentored 20 students through Python fundamentals achieving 95% course completion rate.
- Led weekly sessions on variables, loops, functions, and OOP raising average project performance by 15%.

PROJECTS

Pathful | *React, TypeScript, Python, SQLite, Playwright* | [Live Demo](#) In Progress

- Developing a centralized platform aggregating 500+ internships, scholarships, and fellowships from sources locked in insider networks.
- Built automated scraping pipeline using Playwright and BeautifulSoup reducing opportunity discovery time by 70%.

Stellar Atlas | *JavaScript, HTML/CSS, NASA API* | [Live Demo](#) 2025

- Built an interactive astronomy web app integrating NASA APIs to surface real-time planetary data and satellite imagery.
- Designed responsive UI enabling users to explore 100+ celestial bodies with dynamic visualizations and search.

CashCat | *FastAPI, MongoDB, LangChain, NESSIE API* 2025

- Built AI-powered budgeting platform delivering personalized financial recommendations using LangChain RAG pipelines.
- Reduced student budgeting errors by 35% through conversational AI guidance across 5+ expense categories.

LEADERSHIP & ACTIVITIES

President: National Society of Black Engineers (NSBE), New York Institute of Technology
Fellowships: Microsoft ECLSP Fellow, America On Tech Data Science Fellow
Communities: Google X Mentor Me Collective, ColorStack, Code2040, HeadStart
